# How to upgrade a new firmware for HTS-1000P

When the control pad has a new firmware, just follow the steps below to upgrade the firmware automatically.
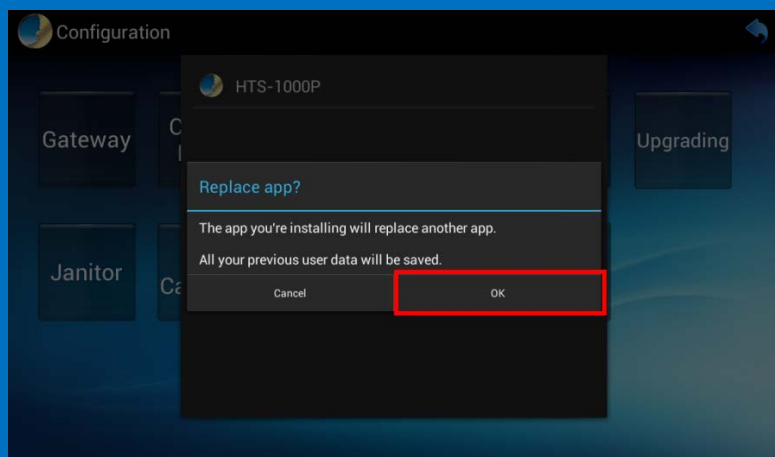

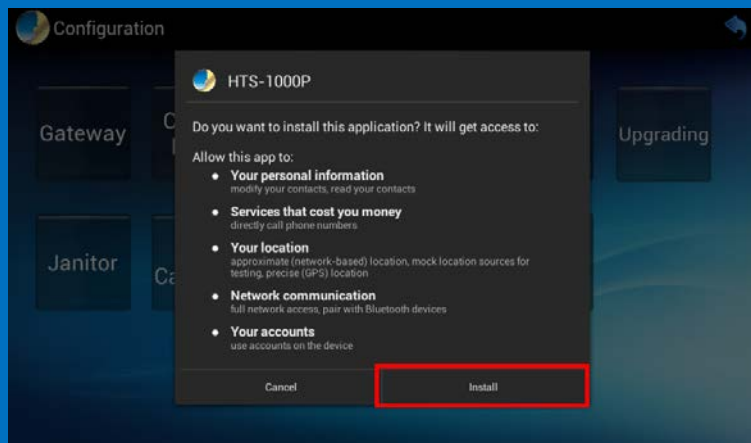

Click the "Upgrading" button.

Control pad will download the latest firmware automatically.

Click "OK" to replace the old one.

Click "Install" to install
the new firmware.

There is a dial pad in the
lower left corner of the
pad screen. This version
supports the SIP function
so that you could dial to
any extension in the IP
PBX system.
